The purpose of the Primate Supply Information Clearinghouse is to provide information for the efficient sharing of laboratory primates by research institutions. The goal is to reduce the number of primates needed for research, particularly wild-caught, imported animals. NEW LISTINGS, published twice monthly, is one of the services provided by the PSIC to list available or wanted animals, tissues, services, or equipment. Advertisements may run until satisfied. The PSIC plays no role in the negotiations leading to the sale, transfer, or exchange of animals, tissue, or equipment, nor does it establish prices or terms of transfer. It is the responsibility of the seller to assure that all regulations governing the transfer of nonhuman primates (USDA, CDC, USF & WS) are met.
